Software Engineer | Full-Stack Web Developer

NEC-registered Software Engineer with 2+ years of production experience building multi-tenant, real-time web platforms used by thousands of users. Delivers features end-to-end with React, Next.js, TypeScript, Node.js and REST/WebSocket APIs, and leads code review, release management and mentoring within delivery teams. Experienced in multilingual, accessible interfaces, including a production Nepali calendar platform.

WORK EXPERIENCE

BlackTech Pokhara, Nepal

Software Engineer | Mid-Level **Apr 2026-Present**

- Led frontend delivery across multiple modules of production products used by thousands of users, owning day-to-day technical execution and project operations, and debugging and fixing production issues across complex operational workflows.
- Improved team productivity and delivery consistency by mentoring juniors and interns through task breakdowns, code reviews, and hands-on guidance.
- Conducted code reviews and tested features before release, and managed repositories, branching strategies, and release readiness to ensure code quality and reliable, predictable production delivery.

Frontend Developer | Junior **Mar 2025-Mar 2026**

- Led frontend development of a consultancy CRM from solution design to continuous delivery, building a micro-frontend style monorepo of interconnected apps for visa, CRM, and workforce operations across separately deployed portals.
- Partnered with clients in weekly requirements and SRS discussions, translating business needs into iterative Agile delivery.
- Streamlined complex visa pipelines across multiple roles and partners with strict compliance and traceability, building centralized workflows that reduced manual handling, accelerated delivery, and simplified finance tracking.
- Implemented activity tracking and audit flows with OneSignal push notifications on every activity event, and integrated WebSocket-based real-time updates and chat for synchronized system-wide interactions.
- Built a lead ingestion pipeline from the public website into the CRM with cross-repo data flow and lead-to-candidate conversion.

Frontend Developer | Intern **Nov 2024-Mar 2025**

- Contributed to a construction-sector ERP with multi-portal workflows (admin, business, customer) and role-based multi-workspace access, with WebSocket-driven real-time activity and support-ticket updates across users.
- Fixed export and PDF generation issues in payroll and timesheet reporting, and strengthened Xero-integrated invoicing for accurate financial data and consistent processing.
- Optimized Redux Toolkit / RTK Query usage to improve caching behavior, data consistency, and UI responsiveness.

PROJECTS

RestroX | Restaurant Management System Preview

- Built frontend modules for RestroX, a multi-tenant restaurant platform spanning Product Owner, Client Admin, and customer apps in a monorepo, using React, Next.js, TypeScript, and Tailwind CSS with a shared design system and next-intl multilingual support.
- Implemented state and data management with Zustand, React Context, and React Query, and integrated payment gateway workflows and WebSocket-based live updates and operational notifications.
- Independently designed and built the RestroX Electron desktop app end to end, covering system design, backend, and UI.
- Owned frontend modules through sprint planning, code reviews, and production releases while supporting junior developers.

Simple Patro | Nepali Calendar Preview

- Built admin workflows for a widely used production Nepali calendar, centralizing daily publishing of holidays, events, horoscopes, and auspicious times with accuracy for time-sensitive cultural content.
- Developed reusable components with structured state management, and worked with the engineering team to improve data integrity and streamline operational workflows.

HealthPost | Health Post Management System Preview

- Built a bilingual (English/Nepali), offline-first platform for Nepal's community health posts with Admin, Health Post and Patient portals covering patient registration, OPD tickets, referrals and medical history.
- Implemented offline support with a service worker, IndexedDB-persisted TanStack Query cache and a queued write-sync flow, so staff keep working on unreliable connections.
- Developed the Node.js/Express REST API with PostgreSQL and Prisma, cookie-based JWT auth with OTP, and role-based permissions mirroring real health-post staff positions.

ESC/POS Printer Emulator | Open-Source npm Package Preview

- Built and published an open-source npm package that emulates a network ESC/POS receipt printer over raw TCP (port 9100), letting POS apps test receipt printing without hardware.
- Wrote a firmware-accurate TypeScript interpreter covering text styles, code pages, raster images, QR and barcodes, paper cuts and status replies across thermal and dot-matrix profiles.
- Built a live React/Vite viewer streamed over Server-Sent Events, plus a CLI and library API covered by node:test suites.

SKILLS

- **Programming Languages & Frameworks:** TypeScript, JavaScript (ES6+), React.js, Next.js, Electron.js, Node.js, Express.js, HTML5, CSS3, Tailwind CSS
- **Backend, Data & State:** PostgreSQL, MongoDB, Redis, REST APIs, WebSockets, TanStack Query, Redux Toolkit / RTK Query, Zustand, React Context
- **Tools & Technologies:** Git, Docker, GitHub Actions (CI/CD), OneSignal, Postman, RedisInsight, Vercel, Render, VS Code, Android Studio
- **Architecture & Concepts:** Component-based architecture, Micro-frontends, Monorepo, Multi-tenant systems, Design systems, Accessibility, Performance profiling.
- **Others:** Code review, Agile delivery, Mentorship, Leadership, Problem Solving, Communication, Ownership.

EDUCATION

Bachelor of Software Engineering **July 2021-July 2025**
Pokhara University | CGPA: 3.71 of 4 | Pokhara, Kaski, Nepal

CERTIFICATIONS & LICENSES

Registered General Engineer **Jan 2026**
Nepal Engineering Council (NEC)
Front End Development Libraries **Aug 2024**
freeCodeCamp
Train the Student Workshop **Sep 2021**
Erasmus+ EU

AWARDS & SCHOLARSHIPS

Best Performer of the Year - Rapid Riser **Mar 2026**
BlackTech
Dean's List Award **Feb 2026**
Pokhara University | Bachelor Degree
