EDUCATION

Pokhara University
Bachelor of Software Engineering
Average GPA: 3.6 of 4

Lekhnath, Kaski, Nepal
Expected Graduation, Nov 2025

PROFILE SUMMARY

Aspiring **MERN Stack Developer** seeking an internship to enhance skills and contribute to innovative web applications. Proficient in React.js, Node.js, Express.js, MongoDB, JavaScript, HTML, and CSS. Eager to work in dynamic teams, learn from experienced developers, and apply the latest technologies to build efficient, user-friendly solutions.

SKILLS

Programming Languages & Frameworks: MongoDB, Express.js, React.js, Node.js, Typescript, HTML/CSS, Tailwind CSS

Tools & Technologies: VS code, Vercel, Render, Postman, Git, Agile, Android Studio, Redis insights

Languages: Nepali (Native), English (Fluent), Hindi (Fluent)

PROJECTS

Easy URL Shortener

Oct 2024- Present

Tools: React/Redux, Node.js, Express, MongoDB, Redis cloud

A URL shortening service that offers personalized short links, real-time analytics, and easy sharing options.

Responsibilities:

- Implemented real-time click tracking and analytics, utilizing MongoDB for data storage and Redis for caching click metrics to optimize performance.
- Designed and integrated the frontend with React and Redux, managing application state for a dynamic user dashboard displaying unique click counts and detailed statistics.
- Generated personalized QR codes for each shortened URL, enhancing user experience and ease of sharing.

Recipe Sharing and Recommendation

July 2024- Oct 2024

Tools: React.js, Tailwind, Context API

A dynamic platform for users to share and discover recipes, with personalized recommendations.

Responsibilities:

- Designed and developed the frontend with a user-friendly interface and seamless navigation.
- Integrated data upload features and used RESTful APIs to display dynamic content.
- Managed authentication and application state with Context API for secure access and a consistent user experience.

Tic-Tac-Toe Game

Tools: Express, WebSocket, Algorithms

A feature-rich Tic-Tac-Toe game offering various play modes and a responsive design for an engaging user experience.

Responsibilities:

- Developed the game featuring interactive elements, smooth transitions, and sound effects for a responsive, cross-device experience.
- Implemented an unbeatable AI with Minimax and Alpha-Beta pruning, plus offline two-player mode.
- Enabled multiplayer mode via Web Socket and made the game a PWA for offline play.

ACADEMIC ACHEIVEMENTS

- Received a Certificate of Participation from the **Erasmus+ Programme of the European Union** for completing the "Train the Student" workshop, covering topics like entrepreneurship, design thinking, and agile project management.
- Led a team of college friends in Software Engineering projects, managing project proposals, reporting, and overseeing development and execution.
